Jose Lopez

Web Developer

Chicago Heights, IL

(708) 833-3779
Jozylopez27@gmail.com

Portfolio: jozyl27.github.io/joselopez-portfolio/
GitHub: JozyL27
LinkedIn: jozy-lopez/

Skills

Front-end: JavaScript, React, jQuery, HTML5, CSS3

Back-end: Node.js, Express.js, Knex.js, PostgreSQL, SQL

Dev-tools: Git, Github, Chrome DevTools, Zeit, Heroku

Bilingual and fluent in both English and Spanish

Projects

Habla: https://spaced-repitition-app.now.sh/
- **Github:** https://github.com/thinkful-ei-leopard/spaced-repitition-jose-christopher-client
- I developed this application's front end components, deployed both front end and back end, and developed API endpoints for the front end client to use.
- **Tech stack:** HTML5/CSS3, JavaScript, Git, GitHub, React, Express, Node, Knex, postgreSQL, Cypress.io, Mocha, Chai
- **Summary:** Habla is an application that uses the spaced repetition technique to help users memorize a foreign language.

Katia: https://katia-jozyedit.vercel.app/
- **Github:** https://github.com/gage117/Katia-client
- I am the product owner of Katia and developed the application's front end components, designed and created the UI / UX, deployed the front end client, and developed API endpoints for the front end client to use.
- **Tech stack:** HTML5/CSS3, JavaScript, Git, GitHub, React, Express, Node, Knex, postgreSQL, Mocha, Chai, AWS S3, Socket.io, Framer Motion, Swapable, Jest
- **Summary:** Katia is a social media application made for gamers by gamers. Quickly and easily find others who share the same games and platforms as you.

Keeply: thinkful-ei-leopard.github.io/joselopez-bookmarks-app/
- **Github:** joselopez-bookmarks-app
- I developed this application's front end components, styled the application, used thinkful's bookmark API for the front end client, and deployed the application using github pages.
- **Tech stack:** HTML5/CSS3, jQuery, JavaScript, Git

- **Summary:** Keeply is a bookmark application and its intended use is to save your favorite sites with long, obscure, and/or hard to remember URLs. App consumes Thinkful's Bookmark API.

Experience

Thinkful / Full-Stack Web Development Program

November 2019 - Current

- Full-stack app development with the following tech: JavaScript, HTML5/CSS3, jQuery, React.js, Git, GitHub, Node.js, Express.js, SQL, postgreSQL
- **During the program I:** had 1:1 mentor sessions with experienced developers, learned essential computer science data structures and algorithms, learned app development best practices, had daily paired programming sessions with other talented developers

Education

Prairie State College / Sociology

September 2017 - May 2019
